

Octopus Change log

Octopus 1.1

Bugs fixed :

- add missing SDN mapping codes in Medatlas non SDN to Medatlas SDN conversion
- fix datetime column format for Medatlas to ODV conversion
- fix error that could occur while cleaning the coupling table
- fix format names displayed in the coupling table
- do not add additional empty line for ODV to ODV conversion
- on windows, support backslash (« \ ») at the end of the output repository path
- allow overriding files on export

Evolutions :

- improve log messages
- use a clear title for CFPoint Title global attribute
- fit dimension for CFPoint to CFPoint conversions, if exported stations are smaller than the biggest one in the input file
